## EDUCATION

### UNIVERSITY OF SOUTH CAROLINA, College of Sciences and Engineering Aiken, SC

B.S in Computer Science

August 2017 - May 2021

GPA: 3.88/4.00; President's List Recipient: Spring 2020 – Fall 2020

---

## EXPERIENCE

### Amazon

San Jose, CA

Technical Support Technician

February 2022 - Present

- Daily responsibilities include analyzing problematic areas, solving them by generating **python** scripts and contributing towards the procedure of transforming current processes to be automated
- Maintaining relevant documentation on **Quip** for the current existing services and execution of pre-defined SOPs to support Amazon business and technical requirements. Interacted with **Asana** software, to maintain and update the assigned tasks as per **Agile methodology**

### Waymo

Mountain View, CA

Software Associate

September 2021 - February 2022

- Triage in simulation software, such as Webviz, in various scenarios including Exploratory testing, and Edge cases evaluating Risk Metrics and Sim Agent Triage.
- Compiled and reported software QA metrics and trends to engineering teams for ensuring all software quality findings were documented, monitored to closure, and escalated when required

### Blingy

San Francisco, CA

Back-End Developer Intern

August 2021 - October 2021

- Explored firebase technology and uploaded data of 1000 products to the firebase real time database
- Presented progress report of current back-end products during monthly company meetings and interacted with **JIRA** software, to maintain and update the assigned tasks as per **Agile methodology**

### Computer Science Department, University of South Carolina

Aiken, SC

Software Developer Intern

January 2020 - April 2020

- Assisted in web projects for the college website using technologies such as **HTML** and **CSS**
- Implemented a student ID card reader application which stores the collected information in local folder using **C#** language and **Visual Studio IDE**

### Math Lab, University of South Carolina

Aiken, SC

Undergraduate Student Assistant

August 2019 - May 2021

- Aided college students with exam preparation, homework, assignments for mathematical courses
  - Communicated with college professors and students regarding unique situations on a daily basis and proposed new marketing technique for Math Lab to increase student involvement by 30%
- 

## ACADEMIC PROJECTS

### Personal Planner

**Technologies:** Java, Spring and Maven

- Implemented a backend service for a personal planner where events can be created and viewed using **REST API** and HTTP protocols. Developed an API for the personal planner with **Java** and **Spring** (Spring Boot) Framework

### 3D Graphic Animation

**Technologies:** C++ Language and OpenGL Libraries

- Implemented a 3D graphic design animation imitating an interrelation between a rocket and the moon by using **C++** programming language and **OpenGL** libraries. User can interact with this animation through mouse, keyboard keys, and context menu

### Capstone Project with NovaTech, LLC

**Technologies:** C# Language and .NET Framework

- Gathered project requirements and deliverables for developing building blocks for the company software
  - Collaborate with team members to developed the user interface using **C#.NET** for the application
- 

## SKILLS AND EXTRACURRICULAR ACTIVITIES

- Programming Languages: C++, C#, Java, Python, HTML, CSS, JavaScript
- Tools: Microsoft Office Suite, Google Suite, GitHub, Slack, JIRA, Quip, Asana
